5.	Airfield at Justerbogs	
	On 21, 23, 27, and 28 June, the following evening exercises were observed over the approximate area of Jueterbog airfield: Four searchlights were focused on an object, presumably a towed target. Shortly thereafter, a number of aircraft blasted the target with tracer ammunition. Judging from the sound of the engines, the aircraft included both jet and conventional types. The deep humming of a conventional plane carrying three fixed lights was heard intermittently. This aircraft was circled or buzzed by jet planes, each of which was equipped with two wing lights. There was no firing during the latter exercise.
